Part B

Scope of Services

Activity Name**AASC in transforming to a competitive electricity market in the context of increasing renewable energy integration****Activity Background and Objective**

In November 2021, Vietnam and Australia's Prime Ministers launched the Australia-Vietnam Enhanced Economic Engagement Strategy, that sets out a vision for how the two countries can work together with the aim of becoming top ten trading partners and doubling two-way investment. The strategy identifies energy cooperation as an important pillar that will contribute significantly to the two nations' growth of commercial and investment turnovers. The implementation plan for this strategy details actions to increase the cooperation in the energy field, including a focus on promoting information exchange, sharing of experiences and technical assistance to Vietnam in the energy sector including regulating electricity operation and monitoring competitive electricity markets.

Also in 2021, the Australian Embassy in Vietnam completed a scoping study to comprehensively review Vietnam's need and identify where Australian expertise and experience in energy industries may make a valuable and sustainable contribution. The study noted that:

- Vietnam's energy sector has grown to the second largest in Southeast Asia. Between 2010 and 2019, electricity production (including imported electricity) increased at an average annual growth rate of 10.2% and is growing on average 1.8 times faster than GDP. Although growth slowed to 2.42% in 2020 [and 2.58% in 2021] due to COVID, demand is expected to return towards trend and keep growing at 8% per annum in the 2021-2030 period, with demand expected to return to pre-COVID rates of around 10% and keep growing at 8% per annum in the 2021-2030 period.
- Rapid growth in the power sector occurs synchronous to major structural reforms, with Vietnam's electricity market under a market reform process with the objective of realising a fully competitive retail market before the end of the 2020s. Efforts are currently focused on preparing to commence operation of a competitive retail electricity market in 2023 in line with the approved roadmap.
- Meeting this demand, managing the market transition and building out the infrastructure of the power sector is framed by a number of strategic issues, including managing the deployment of variable renewables (VREs) into the power system. [i.e. challenges in securing stable and efficient operations of the power system and market caused by the increasing integration of solar and wind].
- Further deployment of VREs will require major shifts in how the power system is structured and operated.

Australia is a regional neighbour and peer facing the same regional challenges and sharing the same aspirations for sustainable, secure and fair electricity services as the basis of prosperity and economic growth. Australia's power sectors share many legacy issues on how energy is generated and transmitted, have very high RE energy potential and some of the fastest rates of RE deployment in the world, and are undertaking (or have recently undertaken) major structural reforms to the markets, governance arrangements and infrastructure that underpin the sector to take advantage of the opportunity presented by a sustainable energy transition.

This Activity will share Australia's knowledge and practical experience in the energy industry and improve the connection between the two countries' energy stakeholders. The Activity will also introduce strong practical experience in designing, operating and monitoring the electricity markets and the integration of RE into the grid and market operation. It targets engagement with senior experts from Australia energy stakeholders to learn from their practical lessons and

- Critical reflection and analysis about what can be put into practice in the participants' own contexts.

Additionally, participants will be expected to apply the knowledge in their work through the development of individual or small group development projects that contribute to the design, operation and monitoring of the electricity markets and the integration of RE into the grid and market operation. Participants will present their proposed project plans at the pre-course workshop, further develop the project during the course in Australia and present their projects (rationale, objectives, steps, challenges, outcomes and next steps) at the post-course workshop.

Participants will also disseminate the learnings from the Activity in their organisations after course completion and, to this end, the course provider is expected to produce materials and training that can be communicated by participants at later stages to wider audiences in Vietnam which disseminate the topic and enhance Australia's image at the same time.

The design and delivery of the Activity will effectively and appropriately address gender equality, women's empowerment and disability and social inclusion (GEDSI) issues. GEDSI must be effectively mainstreamed into content and delivery methods (including learning assessment tasks) must be inclusive and equitable.

Purpose

The purpose of a Code of Conduct and Client Service Standards is to provide a framework for decisions and actions in relation to our Employees' conduct both in employment and as Tetra Tech International Development representatives in front of our clients. - Undertaking their duties and behaving in a manner that is consistent with the provisions of the Code of Conduct and Client Service Standards
- The effective implementation, promotion and support of the Code of Conduct and Client Service Standards in their areas of responsibility
- Ensuring Employees under their control understand and follow the provisions outlined in the Code of Conduct and Client Service Standards.

Employees

All Employees are responsible for:

- Undertaking their duties in a manner that is consistent with the provisions of the Code of Conduct and Client Service Standards
- Reporting suspected corrupt conduct
- Reporting any departure from the Code of Conduct and Client Service Standards by themselves or others.

Code of Conduct

Tetra Tech International Development is a complex organisation, which involves a diversity of relationships. These relationships may be defined by differences in power, status, cultural diversity, organisational structures, contracting relationships, differing country laws, labour laws, international relationships and or national governments. It is essential in such a community that all Employees recognise and respect not only their own rights and responsibilities but also the rights and responsibilities of other members of the community and those of Tetra Tech International Development.

Tetra Tech International Development also recognises that many of their professional employees are also bound by codes of conduct or ethics defined by learned or professional societies or groups. It is recognised that these codes are not always in harmony. It is an obligation of an Employee to weigh the importance of these codes in each particular set of circumstances and notify an appropriate officer of Tetra Tech International Development where such conflict may arise.

Personal and Professional Behaviour

You should not behave in a way which has the intent or effect of offending or embarrassing other Employees or the public in a manner contrary to legislative requirements.

When carrying out your duties, you will:

- Obey any lawful direction from a person who has the authority to give the direction. If you have a dispute about carrying out a direction you may appeal to your senior manager.
- Behave honestly and with integrity. You will avoid behaviour that could suggest that you are not following these principles. This will include a duty to report other Employees who are behaving dishonestly.
- Make sure that you carry out your work efficiently, economically and effectively as you are able and that the standard of your work reflects favourably on yourself and the company.

- Follow the policies of the company in all aspects of work to achieve outcomes that are socially responsible and sustainable.
- Treat Employees, clients and stakeholders with respect.
- Maintain individuals' rights to privacy and undertake to keep personal information in confidence.
- Do not use, possess or distribute pornographic or offensive materials.
- Comply with all national and international laws.
- When representing the Company in public forums:
 1. Employees at all levels represent the Company in the course of their employment including when travelling on Company business, attending functions on behalf of the Company or internal Company meetings, conferences, training programs, seminars or any other function.
 2. Your behaviour in all these circumstances reflects on the Company and its image. As such, you should act in an appropriate business-like manner that will in no way harm the image of the Company or infringe any other Company policy including the Discrimination Free Workplace Policy.
 3. Where any Company function or meeting is held that involves the availability of alcohol, steps should be taken to ensure that it is not abused. You should be aware that being work-related, behaviour in those situations can be subject to disciplinary procedures.

Conflict of Interest

Potential for conflict of interest arises when it is likely that you could be influenced, or it could be perceived that you are influenced by a personal interest when carrying out your duties. Conflicts of interest that lead to biased decision making may constitute corrupt conduct.

Some situations that may give rise to a conflict of interest include situations where you have:

- Financial interests in a matter the company deals with or you are aware that your friends or relatives have a financial interest in the matter;
- Directorships/Management of outside organisations;
- Membership of Boards of outside organisations;
- Personal relationships with the people the company is dealing with which go beyond the level of a professional working relationship;
- Secondary employment, business, commercial, or other activities outside of the workplace which impacts on clients and/or Employees of the company;
- Involvement in Party political activities;
- Access to information that can be used for personal gain.

You may often be the only person aware of potential for conflict. Therefore, it is your responsibility to avoid any financial or other interest that could compromise your ability to perform your duties impartially. It is also your responsibility to report any potential or actual conflicts of interest to your manager.

If you are uncertain whether a conflict exists, you should discuss that matter with your manager and attempt to resolve any conflicts that may exist.

You must not submit or accept any bribe, or other improper inducement. Any advances of this nature are to be reported to senior management. If you are dealing with, or having access to, sensitive information, you should be particularly alert to inappropriate attempts to influence you.

Outside employment/other external business activities

If you work full time for the company and you wish to engage in paid employment/other business activities (including participation in family company) outside your official duties you are required to seek the approval of your manager and Human Resources. The approval should not be unreasonably withheld. However, if there is any real or potential conflict of interest the duties of your position with the company must come first.

If you work for the company on a part time or casual basis, you are required to advise your manager and Human Resources of any real or potential conflict of interest between your employment for the company and any other employment.

The company can request the details of any other employment in the event of allegations of conflict of interest.

Public Comment

Individuals have a right to give their opinions on political and social issues in their private capacity as members of the community.

Employees must not make official comment on matters relating to the company unless they are:

- authorised to do so by the General Manager and CEO
- giving evidence in court
- otherwise authorised or required to by law.

Employees cannot release the contents of unpublished or privileged knowledge unless they have the authority to do so.

Use of Company Resources

Employees must ensure responsible management and security in the use of Tetra Tech International Development resources and any resources managed by them for or on behalf of others.

Requests to use company resources outside core business time should be referred to management (or person authorised to handle such matters), for approval.

If Employees are authorised to use company resources outside core business times they must take responsibility for maintaining, replacing, and safeguarding the property and following any special directions or conditions which apply. Company resources can include equipment, typing facilities, photocopiers, computers, tools, motor vehicles etc.

Intellectual Property/Copyright

The term 'intellectual property' includes the rights relating to scientific discoveries, industrial designs, trademarks, service marks, commercial names and designations, and inventions.

Tetra Tech International Development is the owner of intellectual property created by Employees in the course of employment unless a specific prior agreement has been made. Employees must clarify the intellectual property position before making any use of that property.

Discrimination, Harassment and Workplace Bullying

Employees must not harass, discriminate against, or support others who harass and discriminate against colleagues or members of the public on the grounds of sex, pregnancy, marital status, age, race (including their colour, nationality, descent, ethnic or religious background), physical or intellectual impairment, homosexuality or transgender. Behaviours and actions that are prohibited include, but are not limited to, using inappropriate language or behaviour when dealing with a child or children, bullying, and harassing a child verbally or physically, physical punishment, exposing a child to pornography including on-line grooming and trafficking. Never abuse a position to withhold development or humanitarian assistance or give preferential treatment; in order to solicit sexual favours, gifts, payments of any kind, or advantage.
- Engage in sexual relationships with members of crisis-affected populations given their increased vulnerability and since such relationships are based on inherently unequal power dynamics and undermine the credibility and integrity of aid work.

- obtain informed consent from the child and parent or guardian of the child before photographing or filming a child and in doing so, you must explain how the photograph or film will be used;
- ensure photographs, films, videos and DVDs present children in a dignified and respectful manner and not in a vulnerable or submissive manner. Children should be adequately clothed and not in poses that could be seen as sexually suggestive;
- ensure images are honest representations of the context and the facts; and

Breaches of this child protection Code of Conduct and Client Service Standards may result in disciplinary and/or criminal action.

Any form of corrupt conduct will not be tolerated by the company. Disciplinary action up to and including dismissal will be taken in the event of any Employee participating in corrupt conduct.

Employees should not allow themselves or their work to be influenced by plans for or offers of employment outside of Tetra Tech International Development. If they do there is a conflict of interest and their integrity and that of Tetra Tech International Development is at risk.

Former Employees should not use or take advantage of confidential information obtained in the course of their official duties that may lead to gain or profit, until it has become publicly available.

Client Service Standards

All Tetra Tech International Development staff and team members are committed to the following Client Service Standards:

- Implement activities professionally, with a focus on quality, developmental impact and long term sustainability and with proper regard to cross-cutting development policies, such as gender and the environment, and the whole-of-government approach to development.

- Focus on achieving results and outcomes in a manner that is always accountable and demonstrates probity, procedural fairness and value for money.
- Take responsibility for progress of activities, consulting actively with the client and their counterpart on important problems and issues.

- Use experience and judgement to identify substantive problems in advance and then approach the client (and where appropriate the counterpart) with well-considered, well costed, options and recommendations.
- Demonstrate value adding, innovation, analytical rigour and quality assurance in project or activity management. This includes ensuring quality, clarity and accuracy of reporting, invoicing and financial management.
- Promote high standards of personal conduct/behaviour, teamwork and respect at all times. Lapses in these areas undermine relationships with counterparts, undermine activity effectiveness and reflect poorly on the client.
- Never make decisions that are the proper preserve of foreign governments and/or the funding agency, which alter the substance of the activity or create 'surprises' for the client or the counterpart.

Breaches of the Code of Conduct and Client Service Standards

Employees should note that breaches of certain sections of this Code of Conduct and Client Service Standards may be punishable under laws and legislation.

Breaches of this Code of Conduct and Client Service Standards may lead to disciplinary action. The process for disciplinary action is outlined in Tetra Tech International Development policies and guidelines, relevant industrial awards and agreements.

I acknowledge that I have read and understood the above Code of Conduct and Client Service Standards and will comply with its contents.

Selection Criteria and Information Required for Technical Assessment

1 Technical Proposal

Tenderers should submit a proposal of up to a maximum of ten (10) pages plus required annexes, which substantively and individually address the selection criteria below.

The Technical Proposal will be worth 80% of the total assessment score.

2 Selection Criteria

Proposals should be presented in the following format. Each category should be addressed individually under the criterion headings. The weighting of each of the criterion is provided in the following table:

Criteria

Criteria	Weighting
A. Prior performance and experience	20%
B. Technical capacity and response to Activity specification	30%
C. Core personnel	20%
D. Value for money	10%
Total:	80%

A. Prior performance and experience (20% of the technical assessment)

The Tenderer must demonstrate:

- a) Prior relevant experience in delivering courses and trainings in Competitive Electricity Markets, and the integration of RE into the grid and market operation. Prior experience and knowledge of Vietnam's energy sector and/or energy markets in the Mekong region is desirable.
- b) Experience in the design and delivery of short courses and training for international participants.

B. Technical capacity and Response to Activity specification (30% of the technical assessment)

The Tenderer must demonstrate how it will:

- a) Design the Activity to enable the achievement of learning outcomes and suitable contextualisation for Vietnam. Consideration should be given to proposed topics to be covered during the course, and how the Tenderer intends to facilitate participant learning through classroom sessions with well-informed presenters, interactive exercises, discussions, smaller group sessions, use of case studies and application of adult learning principles.
- b) Incorporate national and/or international guest speakers of relevance into the Activity.
- c) Monitor and evaluate progress towards, and achievement of, individual participant learning outcomes, as well as the overall progress and success of the Activity against its outcomes and objectives.
- d) Identify key risks and/or challenges in the design and delivery of the Activity and how those will be managed.

C. Core personnel (20% of the technical assessment)

The Tenderer must propose a team structure which addresses its capacity to deliver the Activity. Core personnel will include the following positions at a minimum:

- a) **Team Leader** - will be the Lead Technical Adviser for the entire Activity. S/he will be a technical expert who will work with Aus4Skills Component Lead, DFAT and MOFA to design and deliver the Activity. S/he may be supported by other trainers, facilitators, and coaches, as proposed in the Technical Proposal.
- b) **One International Trainer and one Vietnamese Trainer** - together with the Team Leader will design and deliver the content of the Activity, ensure relevant theory and practical application in the Vietnamese context, develop an approach and process for participant application of learning through participant application projects, and identify appropriate guest speakers with knowledge of, and experience with, energy markets in the Mekong region.
- c) **Administrator/Coordinator** - will make all arrangements for the Activity (including accommodation and logistics, financial administration, reporting and coordination), communicate directly with the participants, and ensure efficient day to day management and delivery of the Activity. A local Vietnamese national is preferred.

D. Value for Money (10% of the technical assessment)

The Tenderer must demonstrate how its Technical Proposal represents value for money, through cost effective delivery (i.e. factors such as existing delivery models, partnerships, industry connections, capacity building, resources and materials that will contribute to effective activity delivery) and co-contributions from the Tenderer (either monetary or in-kind).

Part E

Selection Criteria and Information Required for Financial Assessment

1 Financial Proposal

Tenderers must submit a Financial Proposal as a part of their Submission in the MS Excel spreadsheet provided.

It should be a stand-alone proposal and NOT form a part of the Technical Proposal. This proposal must be submitted in a separate document. The Financial Proposal is worth 20% of the total assessment score.

2 Approach to the Financial Proposal

A financial price assessment of those Proposals assessed as technically suitable will be undertaken by the TEC for Tetra Tech International Development. Tetra Tech International Development reserves the right to provide the financial component of any Proposal to TEC members for their examination in the context of resource adequacy evaluation against the selection criteria in the technical assessment process.

3 Limited Information Required for Price Assessment

The final Activity Budget will be negotiated with the preferred Tenderer, including all reimbursable costs that will be incurred by the preferred Tenderer in delivering the Activity

The financial detail required for the Financial Proposal (i.e. price assessment) includes the Tenderer's personnel design and delivery costs, and fixed management fee as indicated in the MS Excel spreadsheet template provided. Quotations must be in whole Australia dollars (\$AUD).

Tenderers should note that inaccurate or inconsistent calculations in the financial component of any Proposal may, in Tetra Tech International Development's sole discretion, be grounds for Tetra Tech International Development to deem that Proposal non-conforming and exclude it from further consideration under this RFP process.

4 Content of Financial Proposal

Within the Financial Proposal Tenderers must address the criteria as set out in the table below. These criteria will be used to make a like-for-like financial comparison.

Criteria
Schedule 1: Design cost Personnel costs for the design of the Activity, expressed as number of person days at a daily rate. The Tenderer must make an assessment of the number of person days required to design the Activity.
Schedule 2: Personnel course delivery cost Personnel costs for the delivery of the Activity, expressed as number of person days at a daily rate for each of the nominated personnel. The number of days used to calculate these costs will normally be greater than the actual days required for Activity delivery. Both the Activity Leader/Designer and the Activity Coordinator will need to work some additional days on preparation, administration and logistics, preparing the Activity Completion Report and Financial Report, etc. Tenderers need to make their own assessment of how many person days will be required to undertake these tasks.
Schedule 3: Fixed Management Fee Total management fee to be charged by the Tenderer for the design and delivery of the Activity as described at Part B: Scope of Services. This must include any applicable insurance as outlined in the Draft Contract at Part C. Tenderers must clearly detail any "other fees" to be charged to the Activity (e.g. financial costs, administration costs, special fees, staff on costs, etc). These "other fees" will be subject to approval during the contract negotiation process. The Fixed Management Fee is exclusive of personal costs and any other costs directly associated with Activity design and delivery.

5 Retention of Price Component of Proposals by Tetra Tech International Development

The financial components of all Proposals, including those not considered technically suitable, will be retained by Tetra Tech International Development.

6 Escalation

There is no provision of escalation.

7 Goods and Services Tax (GST)

Refer to the Draft Contract at Part C.
